

# Dr. Stephan Wirth

## Professional experience

Since 2018 - present	Scientific staff RA1 "Landscape Functioning", Working group Microbial Biogeochemistry Leibniz Centre for Agricultural Landscape Research (ZALF)
2005 - 2017	Senior Scientist at Leibniz Centre for Agricultural Research (ZALF) e.V. Müncheberg, Institute for Landscape Biogeochemistry
1999 - 2005	Senior Scientist at Leibniz Centre for Agricultural Research (ZALF) e.V. Müncheberg, Institute for Primary Production and Microbial Ecology
1995 - 1998	Senior Scientist at Leibniz Centre for Agricultural Research (ZALF) e.V. Müncheberg, Institute for Microbial Ecology and Soil Biology
1993 - 1995	Senior Scientist at Leibniz Centre for Agricultural Research (ZALF) e.V. Müncheberg, Institute for Soil Research
1992	PostDoc scientist at the Institute for Plant Nutrition, University Hohenheim
1986 - 1991	Scientific staff member (PhD student) at the Institute for Plant Pathology and Plant Protection, Georg-August University Göttingen

## Education

1991	Doctorate(Dr. sc. agr.) thesis entitled "Development and application of new methods for analysis of enzyme activities and microbial populations in the humic layers of a podzolic brown earth under beech"
1985 - 1990	Doctorate study at Georg-August-University Göttingen
1985	Diploma (Dipl.-Ing. agr.) thesis entitled "The impact of Aretit flüssig (Dinoseb-acetat), NaTA (TCA) and Derosal (Carbendazim) on cellulolytic and proteolytic soil microorganisms"
1978 - 1985	Study of Agricultural Sciences (Agronomy) at Georg-August-University Göttingen, branch: plant production
